SUMMARY

Passionate about creating digital products that bring together innovative technology, thoughtful design, and Agile best practices. Committed to delivering solutions that not only achieve business objectives but also make a meaningful impact on the people who use them - whether customers or internal teams.

EXPERIENCE

Daugherty Business Solutions

Sr. Software Developer (III - Sr. Consultant) | 2014 - 2023

Delivered enterprise-scale applications and architecture solutions across multiple industries with contracted work within the scope of various clients.

Bayer:

Architected, developed, migrated, and maintained various enterprise scale applications related to crop science utilizing React, AWS, and APIs; upholding Agile best practices.

Cox Communications:

Implemented scaffolding framework for modular React applications, integrating with Adobe Content Manager.

Charter Communications:

Engineered interactive call center solutions empowering representatives to provide enhanced customer service capabilities across Java, .Net, and Node services.

Mastercard:

Developed comprehensive on-boarding documentation, sample code, and API integration to support the MasterPass online purchasing initiative.

Digital Ronan (freelance)

Consultant & Creative Technologist | Present

Design, manage, and influence digital integrations from realms of POS systems to Graphic Design, Video Presentation, and Marketing. I strategize with businesses to expand their visibility and refine their processes with the goal of enhancing their presence and impression in the marketplace.
