SUMMARY

Passionate about creating digital products that bring together innovative technology, thoughtful design, and Agile best practices. Committed to delivering solutions that not only achieve business objectives but also make a meaningful impact on the people who use them - whether customers or internal teams.

EXPERIENCE

Daugherty Business Solutions

Sr. Software Developer (III - Sr. Consultant) | 2014 - 2023

Successfully delivered enterprise-grade applications and architectural solutions for a broad range of clients across multiple industries.

Bayer:

Architected, developed, migrated, and maintained various enterprise scale applications related to crop science utilizing React, AWS, and APIs while upholding Agile best practices.

Cox Communications:

Implemented scaffolding framework for modular React applications, integrating with Adobe Content Manager.

Charter Communications:

Engineered interactive call center solutions empowering representatives to provide enhanced customer service capabilities across Java, .Net, and Node services.

Mastercard:

Developed comprehensive on-boarding documentation, sample code, and API integration to support the MasterPass online purchasing initiative.

Digital Ronan (freelance)

Consultant & Creative Technologist | Present

I design, manage, and implement comprehensive digital integrations - from POS systems to graphic design, video presentations, and marketing strategies. Whether it's developing websites, mobile applications, e-commerce infrastructure, or customer service solutions, I help businesses enhance their visibility and strengthen their presence in the marketplace.
